

## ABOUT THE ARTZ

The Artz is a local aerial arts studio that specializes in circus related skills. With classes in fabric, trapeze, lyra and more, our skilled and trained instructors hone in on technique, form and safety to provide an amazing learning experience and even better atmosphere.

Our Directors have grown the patience to develop an amazing kids program and kept the willingness to learn more personally to maintain an awesome adult program as well. Our goal is to help our clients build their skill base, build their strength, and grow their confidence.

Starting at age 2, with our totz class and all the way up to our intermediate /advanced classes, we strive to provide a service for the entire family. Our kids company, Growin' Up Circus, affords children who want to pursue performing in their future the opportunity to learn what it takes to put on a show and perform all over the city. Practicing upwards of 8 hours a week, this group works towards perfection, as they learn every aspect of their craft.

We want our clients to understand that we provide the best possible training so when they fly, they can be safe and creative with it.

Each year, we give out two rounds of free classes to deserving students who show a passion for learning some form of art. Through YÜTH United through HeARTZ, our 501(c)(3) non-profit, we offer an outlet for creative minds to run wild. Music, lighting, stage design, aerial, art, sound, and much more are taught to passionate children from all over the city and surrounding areas.

YÜTH also provides the community with free performances at various events. Our youth company practices for hours to create small snippets of who they are to show off to the world. With this, we accomplish a few things at the same time. We teach our students that hard work always has its rewards and how to gain the confidence to perform in front of hundreds of total strangers. It also provides an excuse for someone who might be having a hard day to put a smile on their faces.

With our mission to give back to the community through our passion for sound, color, and movement, we want to put all of those together to progress the arts for the current and next generations for years and years to come.
